I don't like holidays with hotels, beaches and swimming pools, and I'm not interested in visiting old cities. I'd like to do something exciting and nowadays lots of holidays have excitement. I could go on a safari and see animals in Africa. Maybe I should visit Australia and swim with dolphins along the coast.

But when I choose a holiday, I always have the same problem. I don't want to see lots of other tourists. I want to be the only person there. The problem is there are other tourists everywhere these days. Is there anywhere in the world without other people?

What about Antarctica? It's huge and beautiful. Between 1,000 and 5,000 scientists work there. It doesn't have a government and there are no cities so there's no pollution or noisy traffic. It has lots of nature and wildlife. It sounds perfect!

Actually, there are also tourists in Antarctica. Tourism in Antarctica began in the late 1950s. About 500 people a year visited Antarctica from Chile and Argentina at that time. Nowadays, about

50,000 tourists from all over the world go by ship to the continent every year and the number of cruises is growing.

Tourists can't spend the night in Antarctica, because there are no hotels where you can live, but you can visit areas with wildlife. Many cruise ships, which take tourists to Antarctica, are members of the International Association of Antarctica Tour Operators (IAATO). They teach their passengers about Antarctica and its wildlife. The cruise companies also give money to environmental organizations in the region. These organizations want to help the nature and wildlife of Antarctica so it doesn't change in the future.

So I think I'll go to Antarctica.
