Most people today cannot imagine life without the Internet. I believe it is one of the most important innovations. Thanks to the World Wide Web, our lives are easier and more exciting today.

First of all, the Internet helps us find information easily. For example, we can read the news and find answers to questions 24 hours a day.

In addition, we can use the Internet for entertainment. We can send emails to friends and shop online. We can even listen to the latest music without leaving our homes.

However, some people would argue that it has a negative effect on society. If we don't have to leave our houses to shop, to learn, or to work, what will happen to life as we know it?

In my opinion, the Internet has more advantages than disadvantages. Our lives are better with it and it is here to stay.

1. Many men and women can live without the Internet
2. We live easier than earlier due to the Internet
3. You can't look for the information in the World Wide Web
4. Every person has time limit to surf the Net
5. You don't have to go to the library to make a report.
6. We can watch movies in the Internet.
7. There are no negative sides in surfing the Net
8. The Internet has only advantages.
